The PK+ Pharmacy Kiosk is our earliest PK+ product. It is an Internet-enabled, terminal-like ATM machine that allows your customers to conveniently order prescription drugs and pharmacy products 24/7.

The PK+ Pharmacy Kiosk may be located at your premises, or remotely at a location of your choice that complies with regulatory requirements.

It is fully integrated with PK+ MyPharmacyApp™, meaning savings in time and trips to your pharmacy: your patients place their order using the app, then drop off the original prescription at the kiosk.
